

PIRANHHA

Simplifying wastewater heat recovery

Introducing our newest product the Piranha. To install this self contained unit simply connect wastewater and potable water lines in and out and the Piranha will handle 80% or more of the domestic hot water heating load. The Piranha has been optimized for 50-200 unit residential buildings and stand-alone commercial applications.

- For domestic hot water heating
- Sized to accommodate 50-200 unit residential buildings and stand-alone commercial applications
- Produces 7,000-15,000 litres hot water / day
- 160,000 BTUH (47kW) / 320,000 BTUH (94kW) nominal heating capacity
- Double-walled construction for potable water
- Self contained and modular design
- Self cleaning
- DHW energy recovery in excess of 80%
